Pond Maintenance & Services

2008

Helping keep ponds clear and healthy
throughout New England.

Our Maintenance Services...

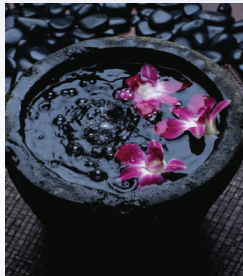

Is your pond giving you troubles? Are you tired of spending more time cleaning it than relaxing around it? Not sure what to do or simply just don't have the time?

Allow us here at Liquid Landscape Designs to remove some of that burden. From simply wanting some help learning the process to having us take over the responsibility all together, we are proud to offer a full range of maintenance services.

Our professional pond maintenance service relies upon creating and maintaining a proper ecological balance within your system so that Mother Nature will be able to do her work properly. In the event of unhealthy pond conditions or sick fish, we have the knowledge and ability to make a proper diagnosis and treat the specific issues at hand. This drastically reduces the need for the applications of "routine" chemical treatments. As part of our commitment to responsible earth practices, most of the products that we use are all natural and are completely safe for the environment and all those who come to enjoy it.

Our commitment to dependable, reliable service and client education is important to us. Our pond specialists are always ready to help guide you through the upkeep process and make sound recommendations to help reduce the time spent maintaining your feature.

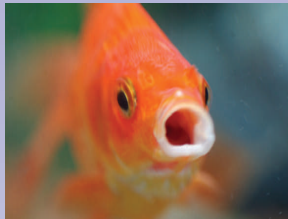

Our pond specialists are prepared for any shape, design and size pond, of any construction, and can service most brands and styles of hardware and filtration.

So this season, let Liquid Landscape Designs help you to minimize your maintenance so that you may maximize your enjoyment!

Pond Maintenance Services...

Every pond is different. Each will have its own maintenance requirements and every clients level of involvement with their ponds will vary. Additionally, a ponds needs can also vary from season to season. All of this can make finding the right maintenance service program challenging.

That's why we have created a number of maintenance programs and options to better service you and your ponds specific needs. Regardless of what program you choose or create, the same professional, friendly and reliable services are what you can expect.

We proudly offer weekly, bi-monthly and monthly routine services programs for those clients who are looking to perform minimum or limited maintenance on their features and offer seasonal maintenance services, such as Spring start-ups and Winter preparation and shut-downs, for those clients who wish to have more involvement without the more labor intensive requirements.

Additionally, we offer a full range of on-call services from basic water treatments, algae control, and water changes to filtration/ pond equipment installation, repair and servicing to more specifically address the occasional and unplanned maintenance needs.

New for 2008! We are pleased to announce that this season our weekly and bi-monthly service contracts will be backed by our own Clearwater Guarantee.

What is our Clearwater Guarantee?

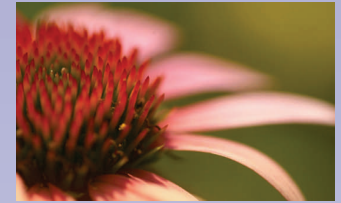

Our Clearwater Guarantee is quite simply our guarantee that your feature will remain clean and healthy throughout the season or the maintenance visit is on us!*

*Please note: This guarantee does not cover acts of nature, gross neglect or problems resulting from equipment malfunction/ failure nor does it imply any warranty on such equipment beyond that stated by the manufacturer. Guarantee covers most recent visit and/or visits required to correct issues.

Plant Services...

A pond is one more aspect of your garden and requires a keen eye and proper plant selection to make it come to life aesthetically and can be key to maintaining the ecological balance that is important to its health. Understanding, selecting and planting the right plants in your garden and pond can be tricky and their individual care and control throughout the season can sometimes be confusing. Well, we're here to help!

At Liquid Landscape Designs we adhere to the "Right Plant, Right Place" philosophy; selecting plants not only for their overall contributing beauty but also for their survivability, their aid in maintaining ecological balance and degree of care.

In addition to our plant design and selection services, we offer installation, removal, thinning, pruning and fertilization services to address your pond and gardens needs throughout the season.

Fish & Pond Health Services...

There's always a chance of a health issue arising in even the best of conditions.

To help in these circumstances, we also provide both simple and comprehensive fish and pond health diagnosis and treatment services. Whether it's an isolated outbreak or a complex case requiring the use of microscopic evaluation, we will identify the problem and provide you with the specific treatment remedy to correct the situation.

Additionally, we also offer a comprehensive water test that provides the following: pH, Alkalinity, Ammonia Nitrogen, Nitrite Nitrogen, Chloride, Hardness, Dissolved Oxygen, Carbon Dioxide, temperature and Salts.
